Dear Colleague:

On behalf of SNMMI, I am pleased to invite you to attend the AACR-SNMMI Joint Conference on State-of-the-Art Molecular Imaging in Cancer Biology and Therapy in San Diego, California taking place February 11-14, 2015.

SNMMI is an international scientific and professional organization founded in 1954 to promote the science, technology and practical application of nuclear medicine. Its 19,000 members are physicians, technologists and scientists specializing in the research and practice of nuclear medicine and molecular imaging. In addition to publishing journals, newsletters and books, SNMMI also sponsors meetings and workshops designed to increase the competencies of nuclear medicine and molecular imaging practitioners, and to promote new advances in the science of nuclear medicine and molecular imaging.

AACR was founded in 1907 by a group of 11 physicians and scientists interested in research, "to further the investigation and spread the knowledge of cancer." Today, the AACR accelerates progress toward the prevention and cure of cancer by promoting research, education, communication, and collaboration.

During your stay in the United States for the AACR-SNMMI Joint Conference on State-of-the-Art Molecular Imaging in Cancer Biology and Therapy, you will not be compensated by SNMMI or AACR nor can you be engaged in any employment. You will be responsible for all of your own expenses. We understand you may want to tour the area after the meeting; therefore, your travel to the U.S. will be from approximately February 8–18, 2015.

Please visit the conference website at www.imagecancer2015.org for more details about the event.

Sincerely,

Judy Brazel
Director, Meeting Services
